SchedU

User manual

Face-to-face tutorial booking

For students, instructors and administrators

SchedU brings tutorial availability, bookings, feedback and records into one workspace. Students reserve a time slot and follow their learning profile; instructors record attendance and feedback; administrators manage accounts, the timetable and statistics.

This manual explains the everyday tasks for each role. System administration and server maintenance are outside its scope.

Students

Book and prepare
Review feedback and progress

Instructors

Run tutorials
Record and review outcomes

Administrators

Manage people and availability
Read the statistics

Edition 2 · October 2026

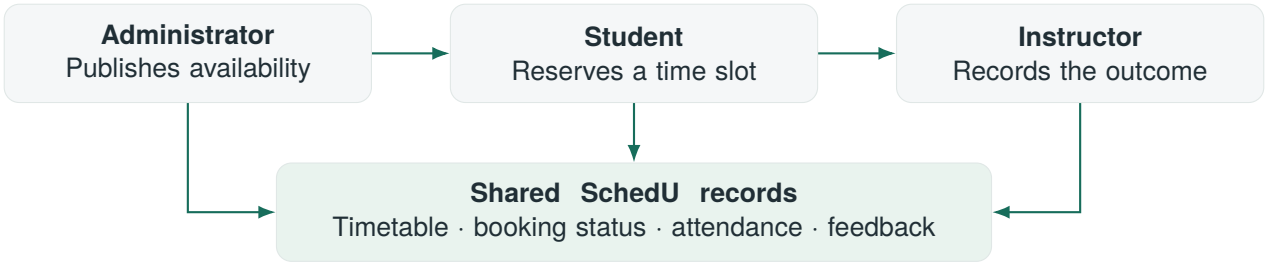

USING THIS MANUAL

Find the guidance for your role

Read the shared guidance first, then the pages for your assigned role. In SchedU, a teacher's role is called **Instructor**. Your role determines which pages and actions appear.

Shared guidance	Page
Sign in and choose your preferences	3
Check your profile and dashboard	4
Students	
Choose a tutorial	5
Confirm, track or cancel a booking	6
Read your feedback	7
Follow your learning profile	8
Review your appointment history	9
Instructors	
Prepare for and run a tutorial	10
Record attendance and feedback	11
Check your approval history	12
Review your guidance history	13
Administrators	
Manage bookings and exceptions	14
Manage people and accounts	15
Import a roster	16
Use account filters and batch actions	17
Read the availability calendar	18
Set up recurring teaching windows	19
Import a timetable and adjust individual slots	20
Remove sessions across the semester	21
Read the statistics	22
Open student and teacher records	23
Resolve common problems	24

How the work fits together

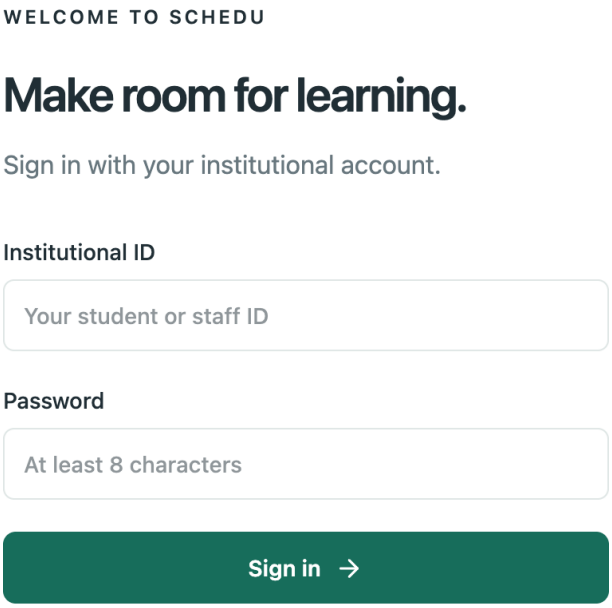

The tutorial itself takes place in the listed classroom. Students see their own records; instructors work with assigned sessions; administrators manage the wider schedule.

EVERYONE

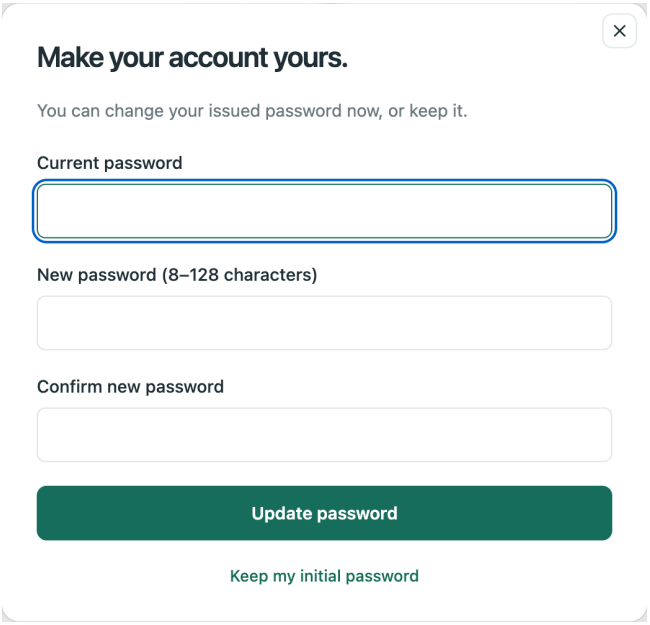

Sign in and choose your preferences

Open the SchedU address supplied by your institution. Enter your **Institutional ID** and password, then select **Sign in**. Use the account issued by an administrator; there is no self-registration step.

Your account is issued by your institute. Contact an administrator if you need a password reset.

The sign-in form uses your student or staff ID.

At first sign-in, you may change or keep the issued password.

Your first sign-in

To change the issued password, enter it under **Current password**, enter a new password of 8–128 characters twice, and select **Update password**. The alternative, **Keep my initial password**, dismisses the prompt without changing it. You can change your password later from **My profile**.

If you have forgotten your password, contact an administrator. An administrator can issue a replacement; the app does not offer an email recovery link.

Language and appearance

The language control at the top of the page switches between English and Simplified Chinese. The **Theme** menu offers **Light**, **Dark** and **System**. System follows the browser or operating system's appearance setting. It does not use the tutorial start time to decide when to switch.

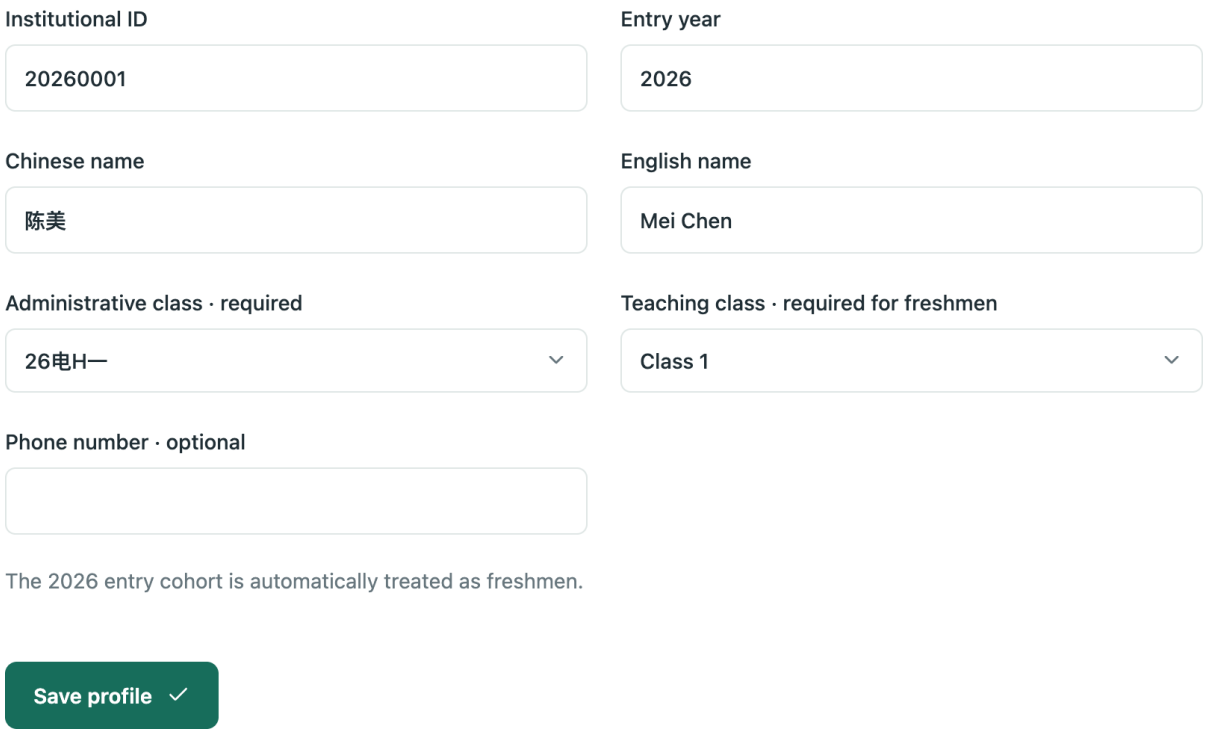

Preferences are remembered on the device. Changing language or theme does not change your bookings. Use **Sign out** beside your account details when you finish on a shared computer.

Time zone
Meeting dates and times always use China Standard Time (UTC+8), including when you open SchedU from another time zone.

EVERYONE

Check your profile and dashboard

Open **My profile** and check your details before using the booking service. Your institutional ID is displayed for reference and cannot be edited here. Ask an administrator if it is incorrect.

A completed first-year student profile. The phone number is optional.

Field	What to enter
Entry year	Your student entry year, or the year you joined the organisation as a member of staff. The Chinese label uses a neutral term for joining.
Chinese / English name	Use the names by which staff can identify you. Both are required for students; staff must supply a Chinese name.
Administrative class	Required for every student. Choose the class from the list.
Teaching class	Required when the student entry year matches the current calendar year in China. Optional for earlier cohorts.
Phone number	Optional. If supplied, it must use a valid phone-number format.

Select **Save profile** after making changes. Class lists are defined by the institution. If the correct class is missing, contact an administrator rather than choosing an unrelated class.

Use Overview to decide what to do next

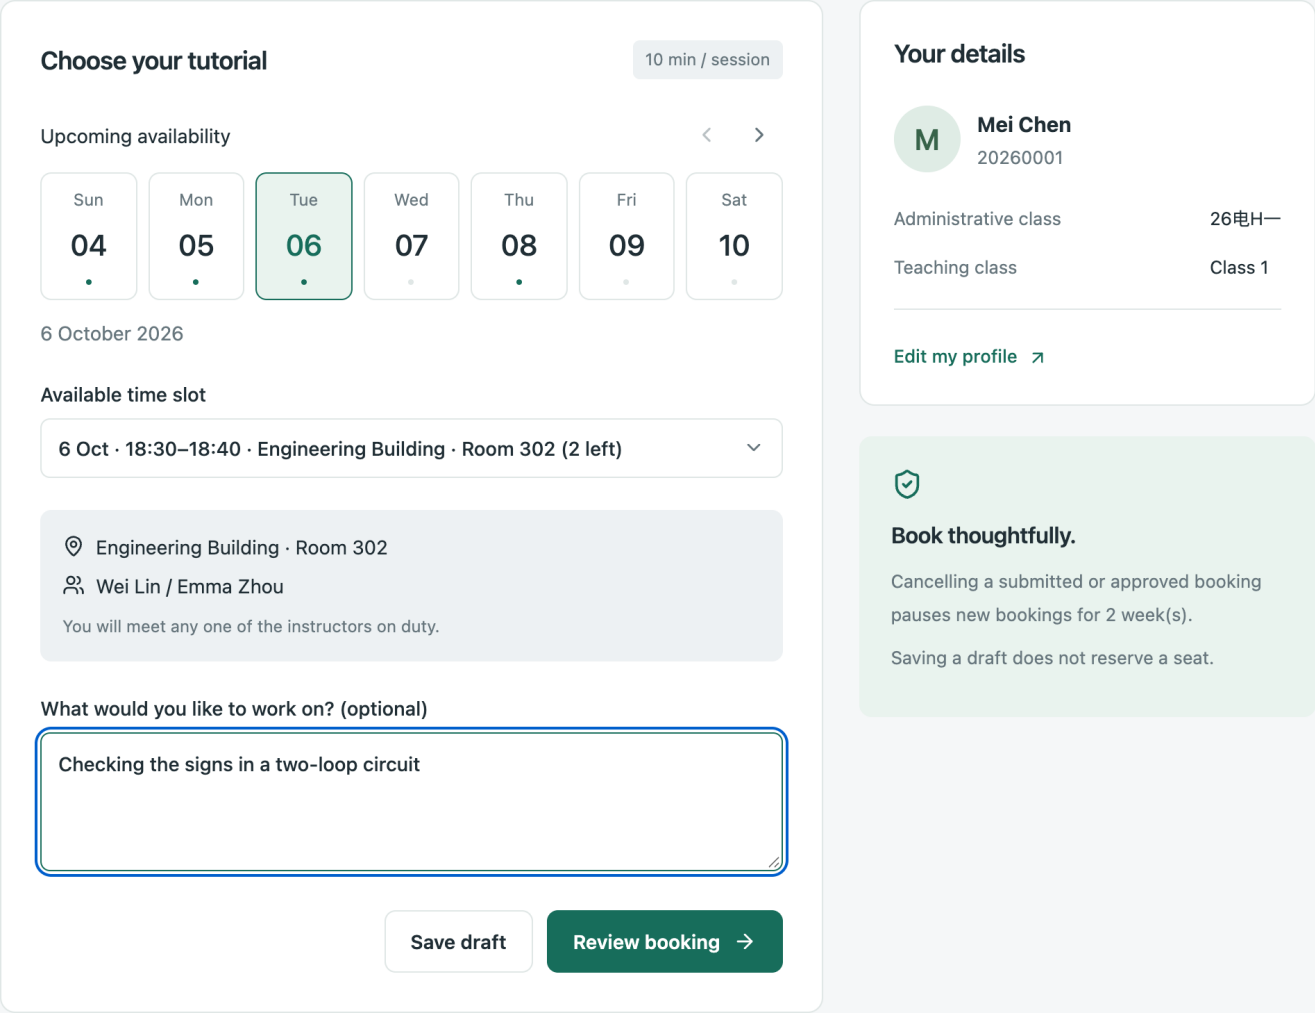

Overview summarises your activity and upcoming tutorials. Students can check active bookings, attendance and feedback, then open **Book a tutorial**, **My bookings** or **My feedback**. Instructors see their teaching activity and sessions; administrators see an institution-wide summary. Below the profile form, students also find their records (page 8) and instructors theirs (page 12).

The navigation changes with your assigned role. You cannot grant yourself another role from your profile.

STUDENTS

Choose a tutorial

Select **Book a tutorial**. Choose a date, then open **Available time slot**. Each option shows the date, meeting time, classroom and remaining seats. Use the week arrows to browse further ahead within the institution's booking period.

A Tuesday booking for 18:30–18:40. Two instructors are on duty, and two seats remain before submission.

You reserve a time slot, not a named instructor. You may meet any instructor listed as on duty. Check that you can reach the classroom for the start time, then add a brief question or topic if useful. The topic is optional.

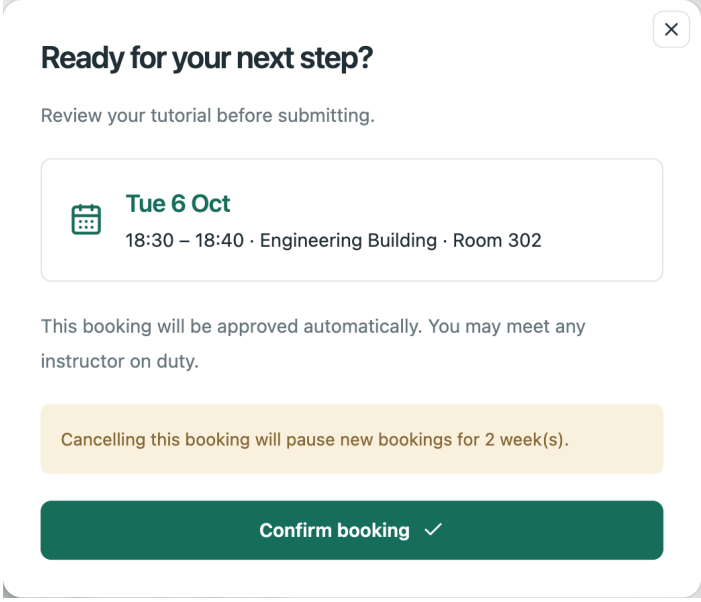

Save draft keeps an unfinished booking under **My bookings → Drafts**. A draft does not reserve a seat. Open its details and select **Continue draft** to return to the form, or **Delete draft** to remove it without a cancellation pause.

Select **Review booking** when you are ready. Your student profile must be complete before you can submit. The demonstration allows one active booking at a time and shows availability for the next 28 days; your institution can change these limits.

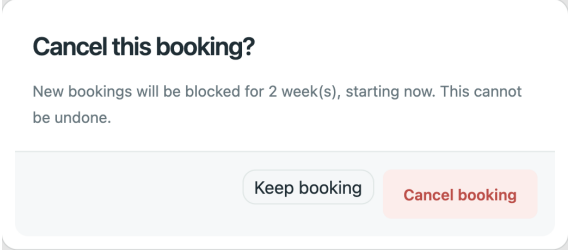

STUDENTS

Confirm, track or cancel a booking

Review the date, time, classroom and cancellation rule, then select **Confirm booking**. A slot with an assigned instructor is approved automatically. An unstaffed slot stays **Submitted** until a member of staff approves it.

Submission confirms the selected time and its cancellation policy.

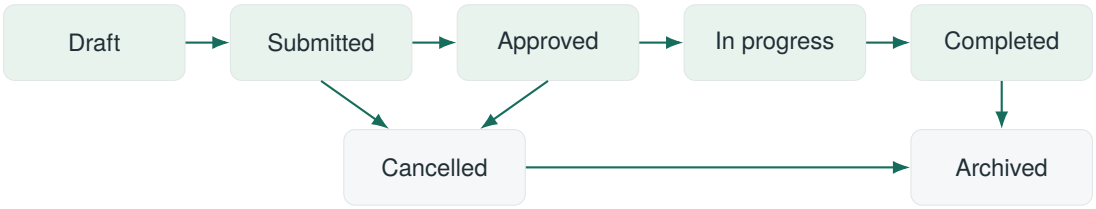

Choose **Keep booking** to leave the reservation in place.

The pause shown here is two weeks. Always read the period displayed by your institution.

Open **My bookings → Upcoming & active** to check the result. **View details** shows the classroom, instructor pool, topic and status history. Drafts and past records have separate tabs.

The booking's progress

Automatic approval moves straight to Approved. Staff may save feedback from Approved once the tutorial has started, without first selecting In progress. Archiving retains the record.

If you need to cancel or change the time

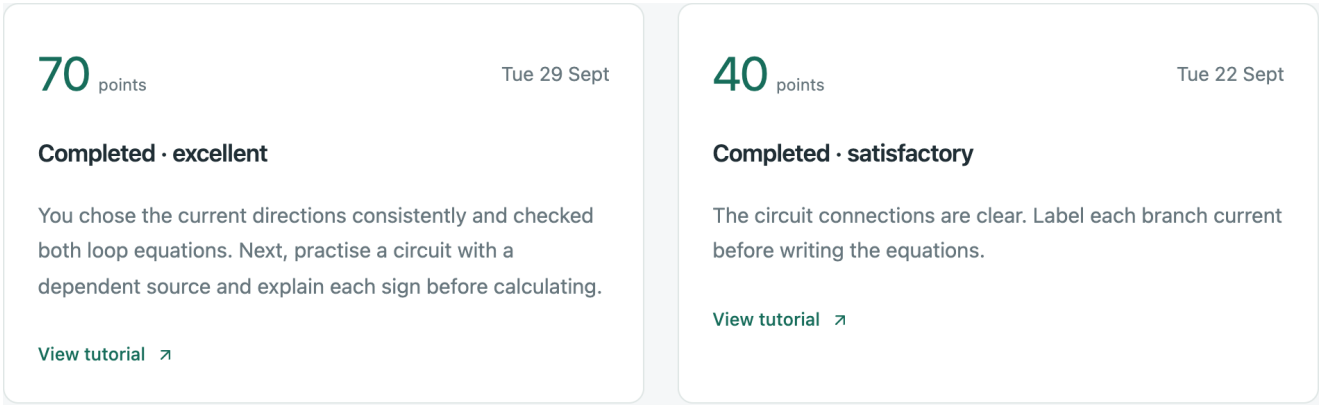

A student can cancel a submitted or approved booking before its start time. Open its details, select **Cancel booking** and read the confirmation. Confirming cancellation pauses new bookings from that moment for the displayed period. It does not automatically cancel other existing bookings.

There is no direct rescheduling action. If you need a different time, contact an administrator before cancelling: cancelling the booking yourself starts the booking pause. A cancellation made by authorised staff does not apply this student penalty.

STUDENTS

Read your feedback

After the tutorial, open **My feedback**. Each card shows the meeting date, evaluation mark, description and any written advice. Completed feedback remains available when the meeting is archived.

Two completed tutorials for the same student. Written feedback identifies what to practise next.

Understanding the evaluation

The mark is one of the institution's configured evaluation options. It is not a percentage or a score out of 100 unless your institution explicitly uses it that way. The demonstration uses these standard options.

Mark	Meaning
0	Absent.
30	Attended with poor performance.
40	Completed with satisfactory performance.
70	Completed with excellent performance.

Read the written comment alongside the mark. Use it to identify a specific exercise, explanation or question to prepare for your next tutorial. If there is no written comment, the evaluation still records the outcome.

Before your next meeting

Check **My bookings** for the confirmed time and room. Bring the work or question you described when booking. Arrive in time for the short appointment; the gap after it is reserved for the teaching schedule and is not additional tutorial time.

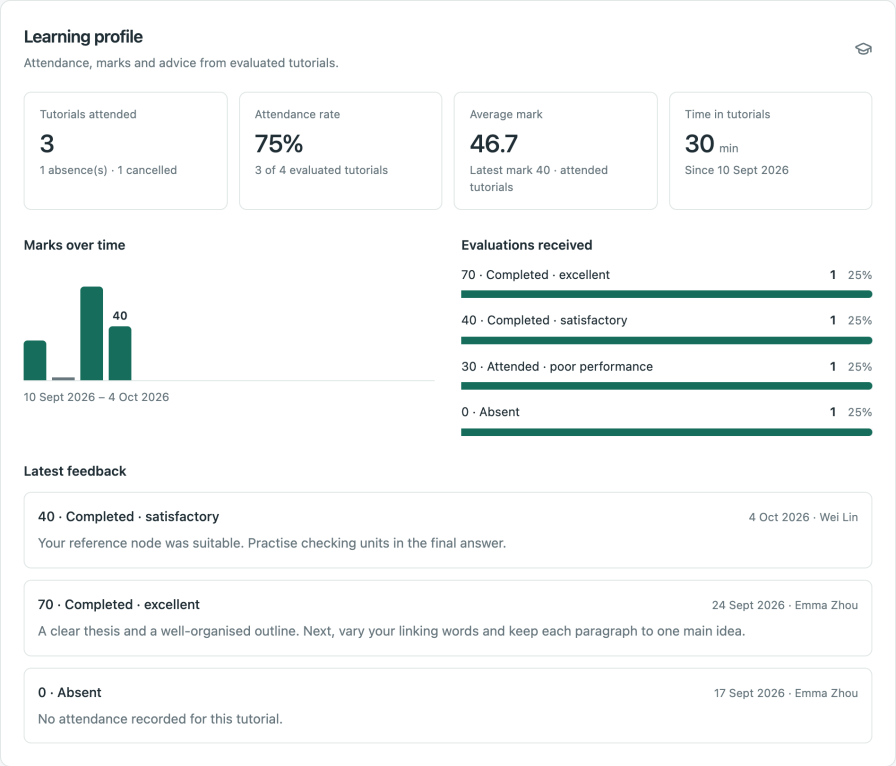

If feedback or attendance appears incorrect, contact the instructor or an administrator with the meeting date and time. Students cannot edit evaluation records.

No feedback yet?
An approved or in-progress booking has not been completed. Check its status first. Ask the instructor if the tutorial has finished but the feedback has not appeared.

STUDENTS

Follow your learning profile

Open **My profile**. Below your details and password, **Learning profile** summarises every tutorial that a member of staff has evaluated. It fills in by itself when attendance and feedback are recorded; there is nothing for you to enter.

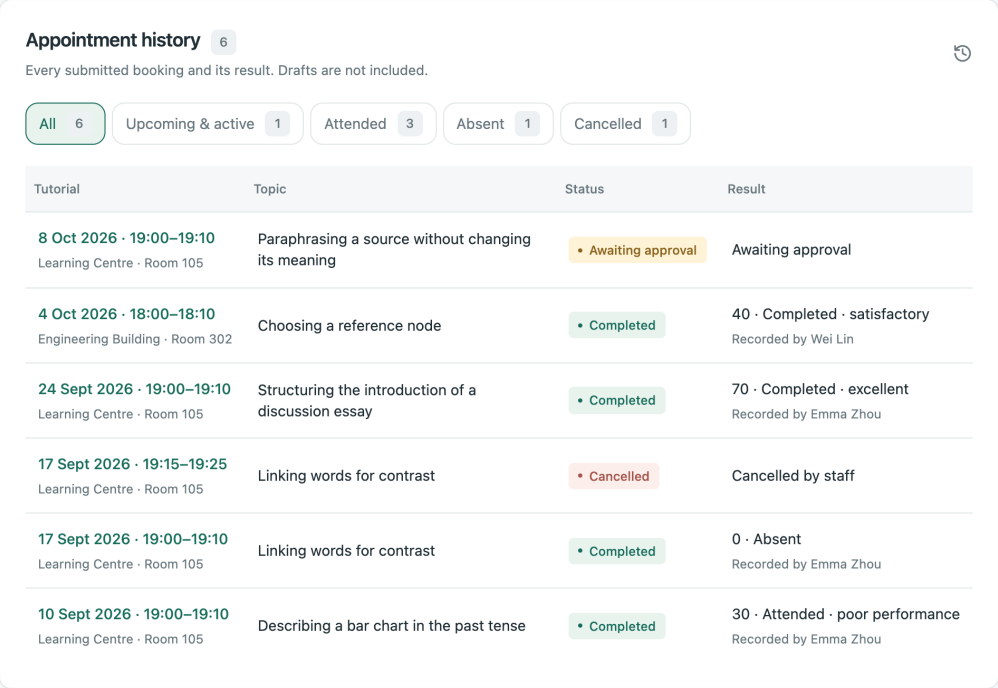

A student with four evaluated tutorials: three attended and one absence. The cancelled booking is counted separately.

Part of the card	What it shows
Tutorials attended	Evaluated tutorials with any mark other than zero. Absences and cancellations are counted beneath it.
Attendance rate	Attended tutorials as a share of evaluated tutorials. Upcoming, cancelled and draft bookings are left out.
Average mark	The mean mark of the tutorials you attended, using your institution's evaluation options (page 7); it is not a percentage. An absence lowers the attendance rate, not this average.
Time in tutorials	The scheduled length of the tutorials you attended, added together.
Marks over time	One bar for each evaluated tutorial, oldest on the left, up to the latest 24. An absence is a short grey mark. Point to a bar for its date and evaluation, or select it to open that tutorial.
Evaluations received	How often you received each evaluation option, and its share of your evaluated tutorials.
Latest feedback	The three most recent written comments, with the date and who recorded each one.

STUDENTS

Review your appointment history

Appointment history is the second card under **My profile**. It lists every booking you have submitted, newest first. Drafts are not listed because a draft never reserved a seat.

Six appointments: one waiting for approval, three attended, one absence and one cancelled by staff.

The filters above the table narrow the list, and the number beside each filter is its count. Select a tutorial's date and time to open its details, with the instructors on duty, your topic and the full status history. Longer histories show ten appointments per page.

Result	Meaning
Awaiting approval	The slot had no instructor when you booked. Staff must approve the request before its start time.
Not approved before the start	The request was still waiting when the tutorial was due to begin. Ask an administrator what to do next.
Upcoming	Approved and not yet started. The second line shows whether it was approved automatically or by a named member of staff.
Awaiting feedback	The start time has passed and no outcome has been recorded yet.
A mark and its evaluation	The tutorial was evaluated; a mark of zero is an absence. The second line names who recorded it.
Cancelled by the student or by staff	Who cancelled. Only your own cancellation starts a booking pause.

Status is the booking's stage in the diagram on page 6. Archived appointments keep their result here.

INSTRUCTORS

Prepare for and run a tutorial

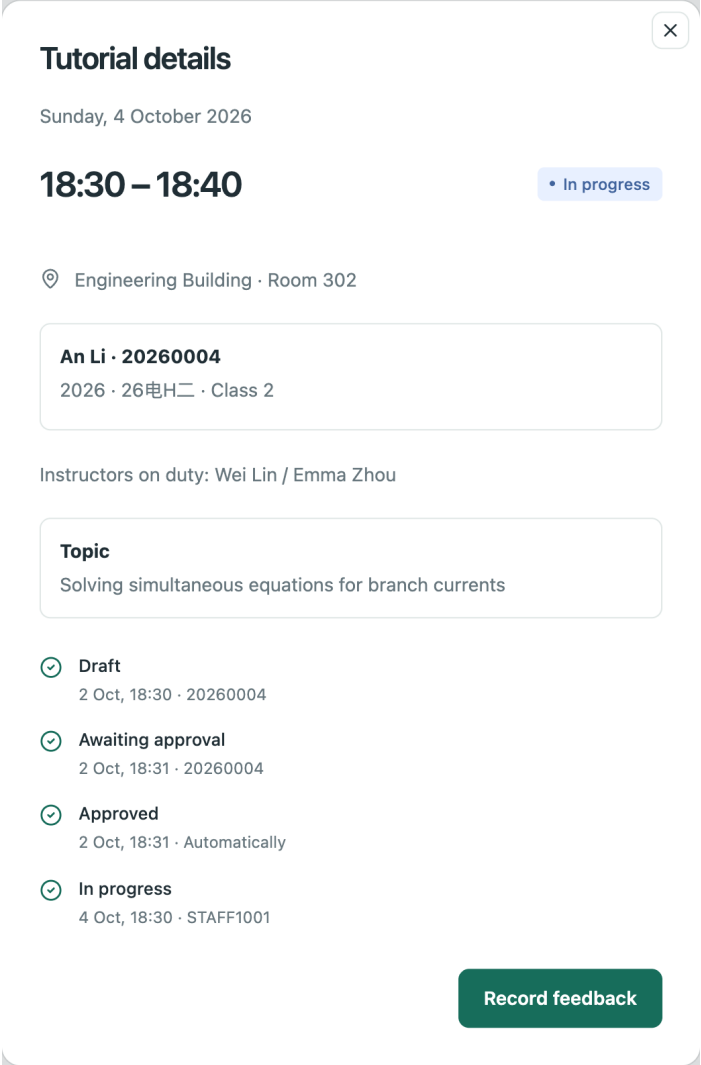

Use **Overview** to review your activity, then open **My sessions** for the bookings assigned to your instructor pool. A student has reserved a place in the time slot and may meet any instructor on duty.

Before the appointment

Open **View details** to check the student's name, institutional ID, class and topic. Confirm the room and scheduled time.
If a booking is **Submitted** and falls within your responsibility, **Approve** confirms it before the start time. If it is outside your assigned sessions, ask an administrator to handle it.

At the appointment

For an approved booking, **Start session** becomes available at the scheduled start time. This changes its status to **In progress**.
After the tutorial, use **Record feedback**. It is also possible to record feedback directly from an approved booking once its start time has passed.
When several instructors share a slot, coordinate who will record the outcome. Check the current status before acting.

An in-progress tutorial, with the student's details, topic and status history.

Cancellations and changes

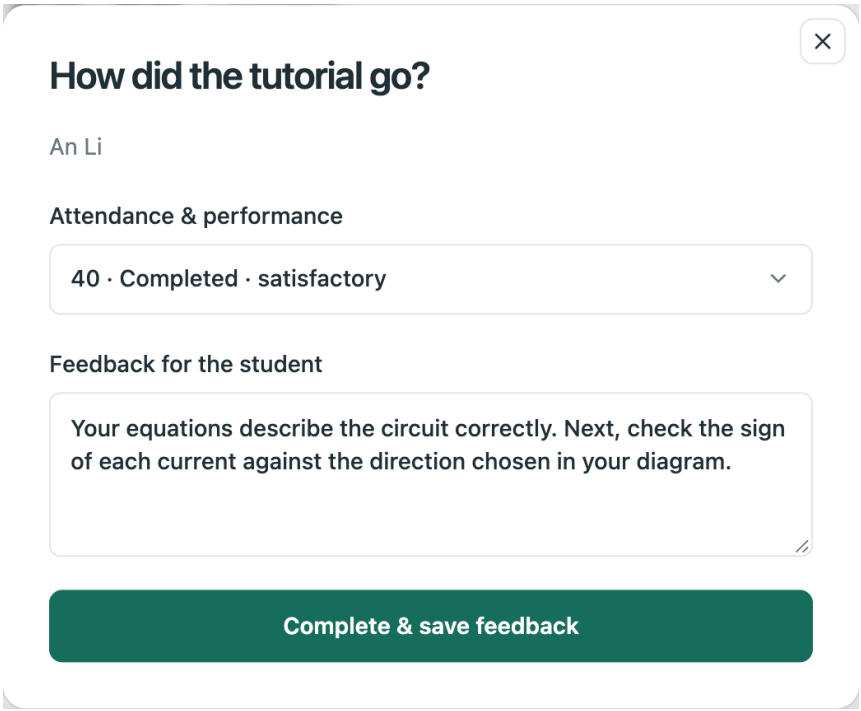

Instructor cancellation is disabled by default. If your institution enables it, **Cancel booking** appears for submitted or approved bookings that you manage. An instructor cancellation does not pause the student's future booking rights.

If the action is unavailable, ask an administrator to manage the change. In-progress and completed bookings cannot be cancelled through this action. Arrange any necessary timetable change through an administrator.

INSTRUCTORS

Record attendance and feedback

Open a started tutorial's details and select **Record feedback**. Choose the appropriate **Attendance & performance** option, add feedback for the student, then select **Complete & save feedback**.

The selected evaluation and written comment are saved together. The student can read the comment.

Record the outcome accurately

Use the institution's evaluation descriptions, rather than treating the numerical mark as a free-entry score. The default options are shown on page 7. Give a brief account of the student's work and a concrete next step when written feedback would help.

An attended tutorial can be completed from **Approved** or **In progress** after the scheduled start time. The **0 · Absent** option cannot be saved before the scheduled end time. Wait until the whole appointment has elapsed before recording a non-attendance.

After saving

Saving the evaluation changes the booking to **Completed**. The student can read it under **My feedback**; you can review completed outcomes under **Feedback**. The booking no longer counts towards the student's active-booking limit.

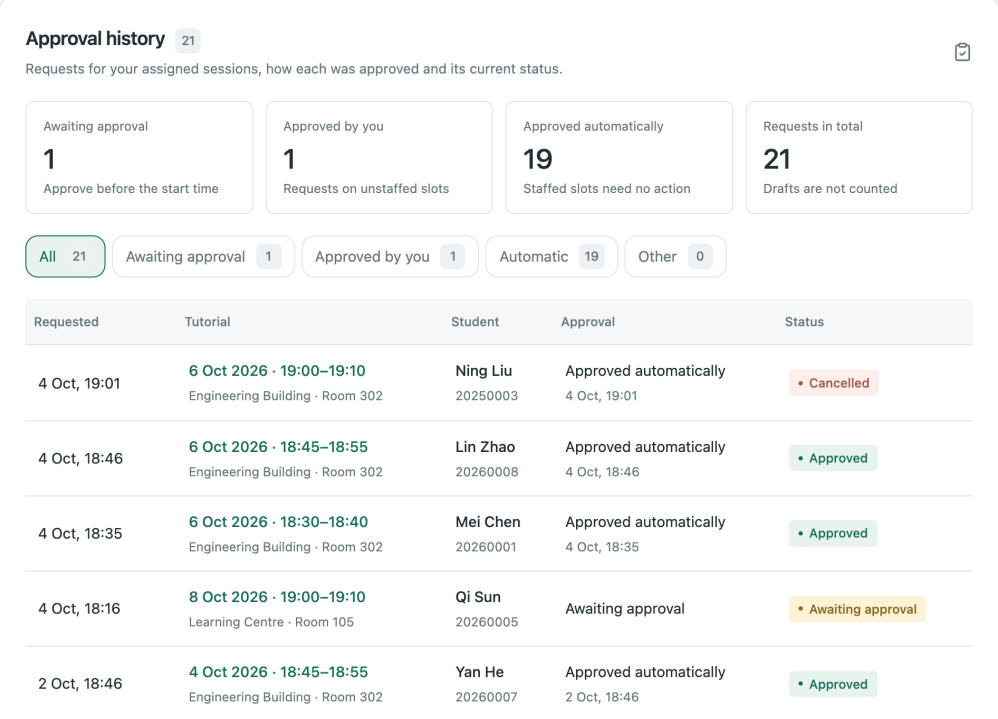

Open the details of a completed or cancelled booking and select **Archive** when it should be retained as a past record. Archiving does not delete the booking, its history or its feedback.

Check the mark and wording before saving. The current interface does not offer a general edit action for a completed evaluation. If a correction is needed, report the booking details to an administrator.

INSTRUCTORS

Check your approval history

Open **My profile**. **Approval history** lists the booking requests for the sessions assigned to you, newest request first, and shows how each one was approved. Its **Status** column gives the booking's current stage.

An instructor with 21 requests: one waiting for approval, one approved personally and 19 approved automatically.

A request is listed when you are in the instructor pool of its slot or of its teaching window, and whenever you approved it yourself. Select a tutorial's date and time to open its details; **Approve** is there for a waiting request.

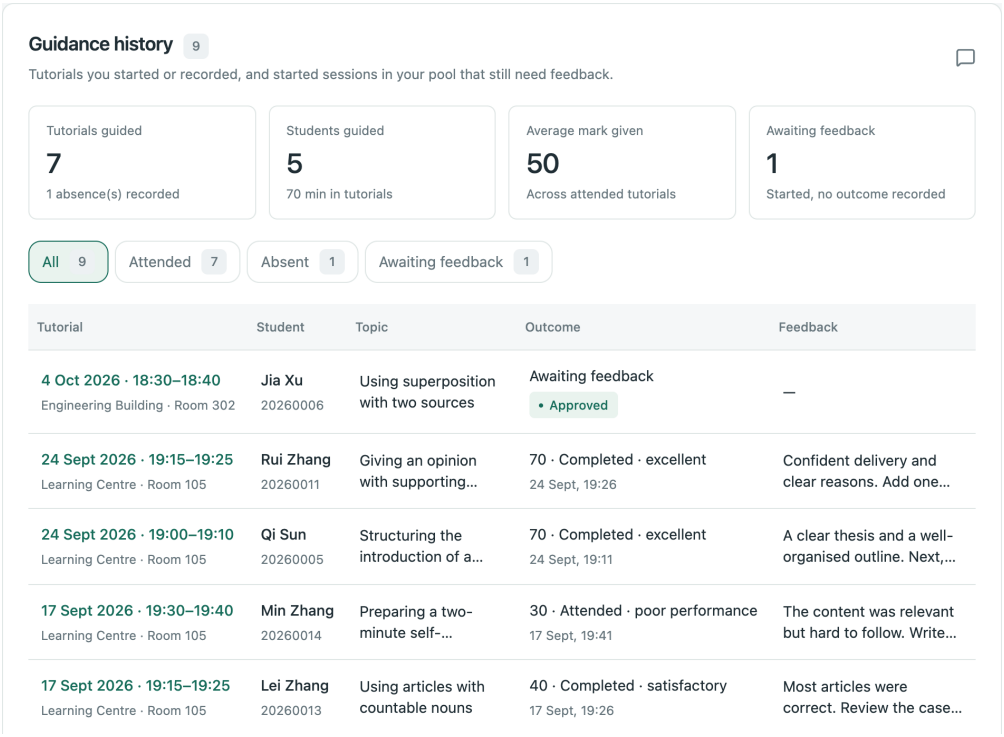

Approval	Meaning
Approved automatically	The slot had an assigned instructor, so the booking was approved when the student submitted it.
Approved by you	You approved a request for a slot that had no instructor. The time of your approval is shown.
Approved by a named person	A colleague or an administrator approved it.
Awaiting approval	Nobody has approved it yet. It can only be approved before the tutorial's start time.
Not approved before the start	The start time passed while it was waiting. Ask an administrator to resolve it.
Cancelled before approval	The booking was cancelled while it was still waiting.

The figures count the same list. **Requests in total** leaves out drafts. Use the filters to see one group at a time; the list shows ten requests per page.

INSTRUCTORS

Review your guidance history

Guidance history, the second card under **My profile**, lists the tutorials you started or recorded, with each outcome and the feedback you wrote. It also lists started sessions that still need an outcome.

Seven tutorials guided for five students, one absence recorded and one started session still waiting for feedback.

Whose history a tutorial appears in

1. A completed tutorial belongs to whoever saved its feedback. If you start a session and a colleague records the outcome, it is listed for your colleague.
2. A session in progress belongs to whoever selected **Start session**.
3. An approved tutorial whose start time has passed, and which nobody has started or recorded, is **Awaiting feedback** for every instructor in its pool until one of you records it.

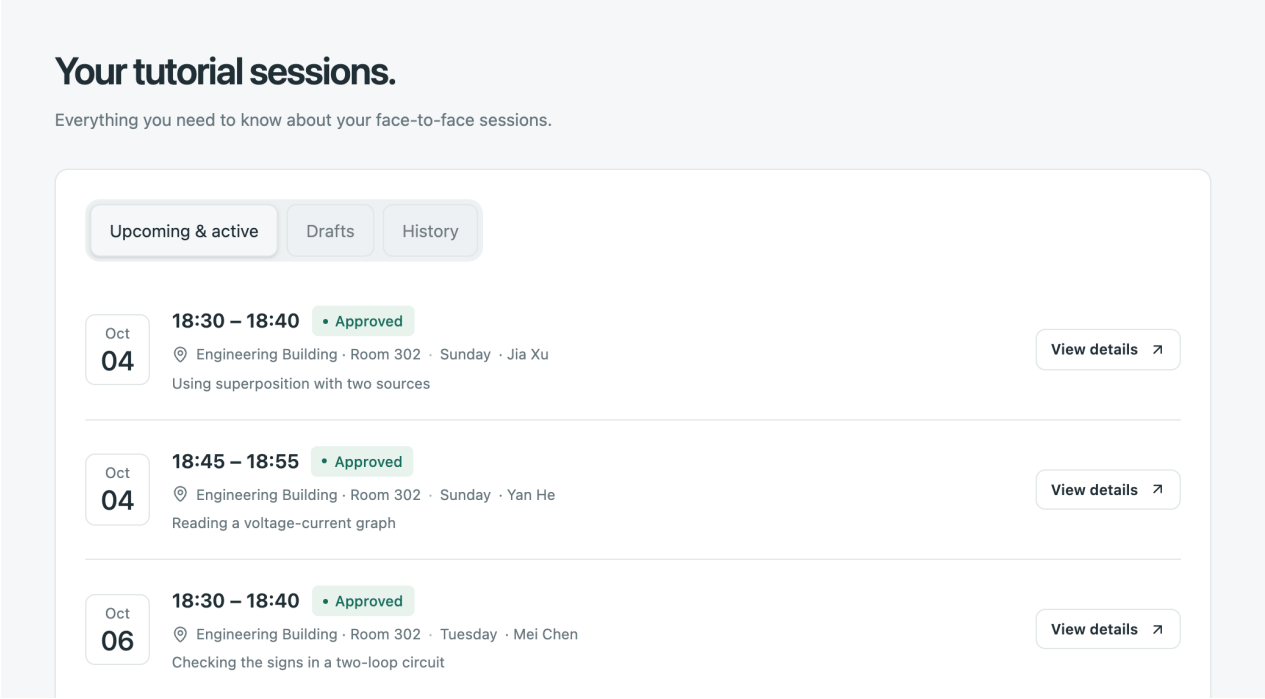

Figure	What it counts
Tutorials guided	Tutorials you recorded with any mark other than zero. Absences you recorded are counted beneath it.
Students guided	Different students among those tutorials, with the total scheduled time.
Average mark given	The mean mark of the tutorials you recorded as attended.
Awaiting feedback	Started sessions without an outcome. Open each one and select **Record feedback**.

Records that you approved or recorded stay in your history if you are later moved to other sessions. You can still open them, but the staff actions are available only for sessions currently assigned to you.

ADMINISTRATORS

Manage bookings and exceptions

Open **All meetings** to review bookings across the institution. **Upcoming & active** contains submitted, approved and in-progress bookings; **History** contains past outcomes. Select **View details** to inspect a meeting and its status history.

An administrator's view of active bookings. Each record identifies the student, time, room and current status.

Approve a pending booking

For a **Submitted** booking, confirm that the tutorial can be staffed and then select **Approve** before its scheduled start. Staffed slots are normally approved automatically when students book them. An administrator can act across the schedule, including bookings outside a particular instructor's pool.

Handle a cancellation or timetable change

Open the submitted or approved booking and select **Cancel booking**. Review the confirmation before proceeding. A management cancellation does not impose the student booking pause. Inform the student about the change through your institution's usual channel.

There is no direct move-to-another-slot action. Where a schedule change affects existing bookings, arrange it with the students, resolve the active reservations and then update availability. In-progress and completed bookings cannot be cancelled through the cancellation action.

Complete or archive a record

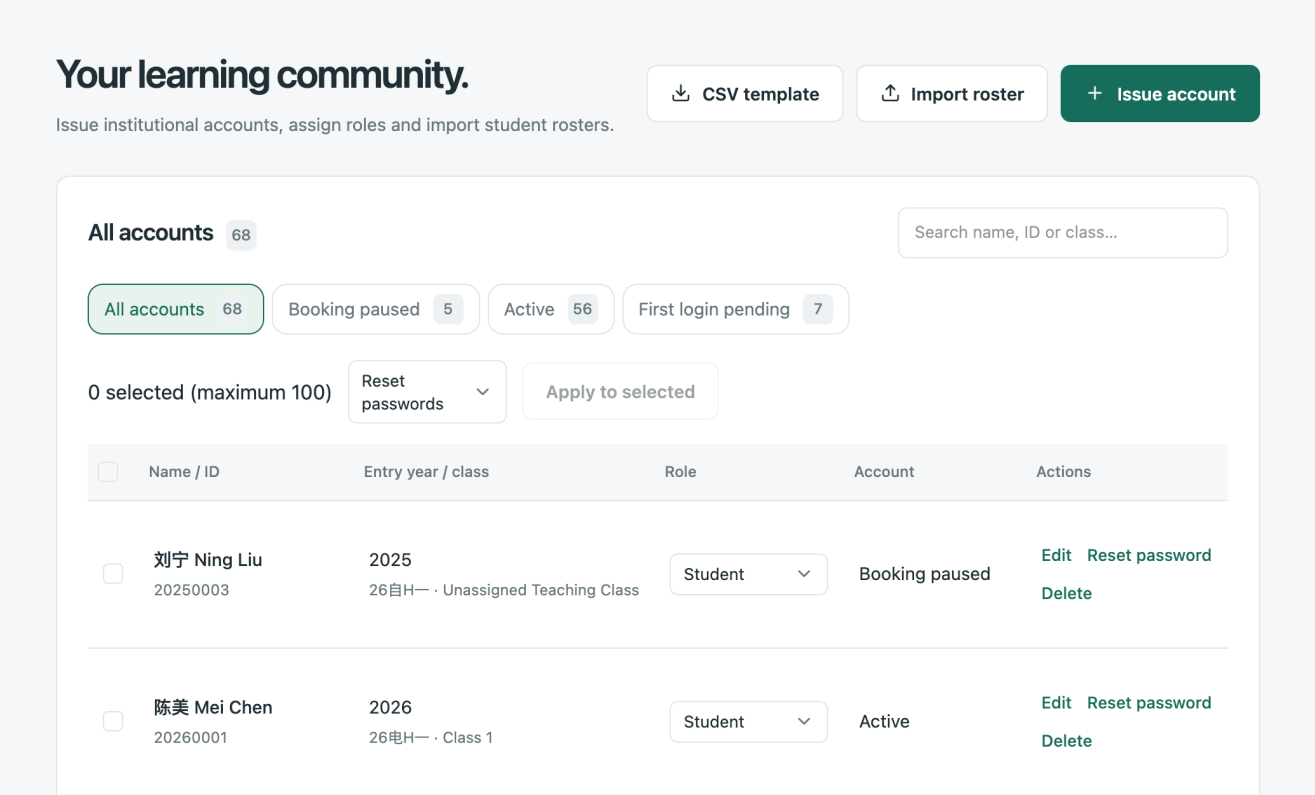

Administrators have the same **Start session**, **Record feedback** and **Archive** controls described on pages 10–11. The same start-time and absence checks apply. When completing a record on an instructor's behalf, confirm the attendance and evaluation with the instructor first.

Archiving a completed or cancelled booking preserves its history and feedback. It does not remove account dependencies or make a linked account eligible for ordinary deletion.

ADMINISTRATORS

Manage people and accounts

People & rosters lists the accounts in SchedU. Search by institutional ID, name or administrative class. A missing teaching class is displayed as **Unassigned Teaching Class**; it is allowed for students from earlier entry cohorts.

The account list includes role controls, profile editing and account actions. This view shows the first two rows.

68 accounts · Page 1 of 2 First Previous 1 2 Next Last Go to page 1 Go

There are 50 accounts per page. Use numbered pages, First, Last or Go to page to move through the roster.

Issue, update and remove accounts

Issue account creates a student or instructor account with an institutional ID and names. A random initial password is then displayed. Download the credentials and give each user their own details privately. A student must complete any missing profile fields before submitting a booking.

Use **Edit** on an account row to correct personal details. The role menu changes a student to an instructor, or an instructor to a student. Existing active bookings or teaching assignments may prevent a role change. Changing a role ends that account's current sessions.

Reset password issues a replacement and ends the account's current sessions. **Delete** removes an unused account; meeting records or instructor assignments prevent ordinary deletion. Resolve the reported dependency or seek help from the system administrator.

Ordinary administrators manage students and instructors. Administrator privileges, global configuration and full-system maintenance belong to the system administrator.

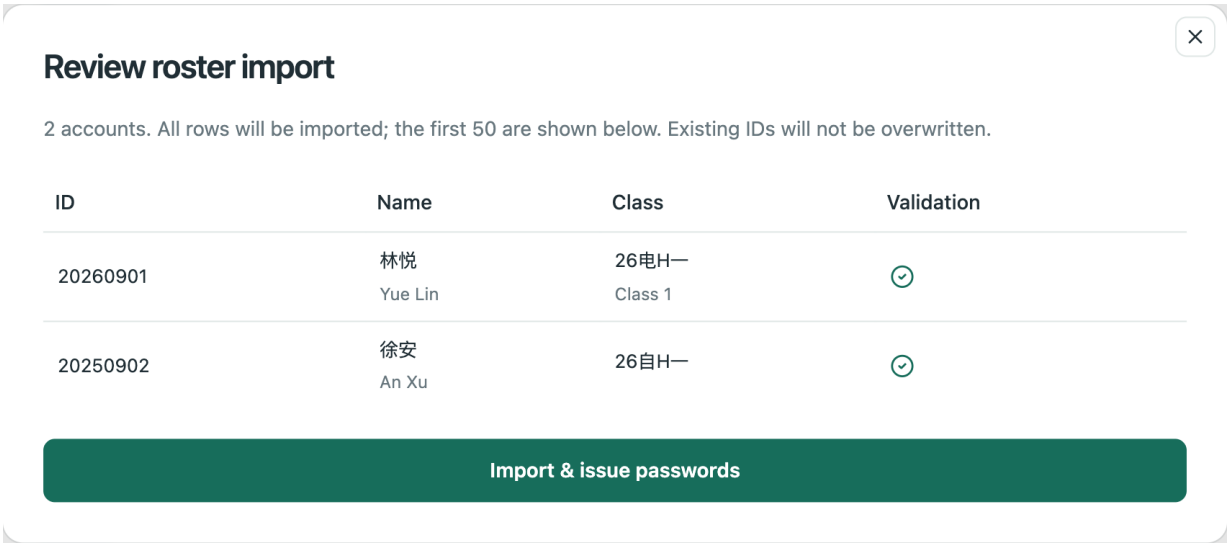

ADMINISTRATORS

Import a roster

Use **CSV template** on **People & rosters** as the starting point. Save the completed file as a UTF-8 CSV so that Chinese names and class labels are preserved. Keep institutional IDs as text in a spreadsheet, particularly if they contain leading zeroes.

CSV column	Content
`id`	Unique institutional ID. Existing IDs cannot be overwritten by a roster import.
`role`	`student` or `instructor`. A blank value means student.
`grade`	Entry or joining year, for example `2026`.
`adminClass`	Exact administrative class label from the configured list; required for students.
`teachingClass`	Exact teaching class label. Required for the current-year student cohort; otherwise it may be blank.
`chineseName`	Chinese name.
`englishName`	English name; required for students.
`phone`	Optional. Leave the cell blank if no number is supplied.

Select **Import roster** and choose the file. Review the names, classes and validation results before selecting **Import & issue passwords**. Correct duplicate IDs or invalid fields in the source file and import again. If validation fails, the import creates no accounts.

A two-account preview: the earlier-cohort student has no teaching class.

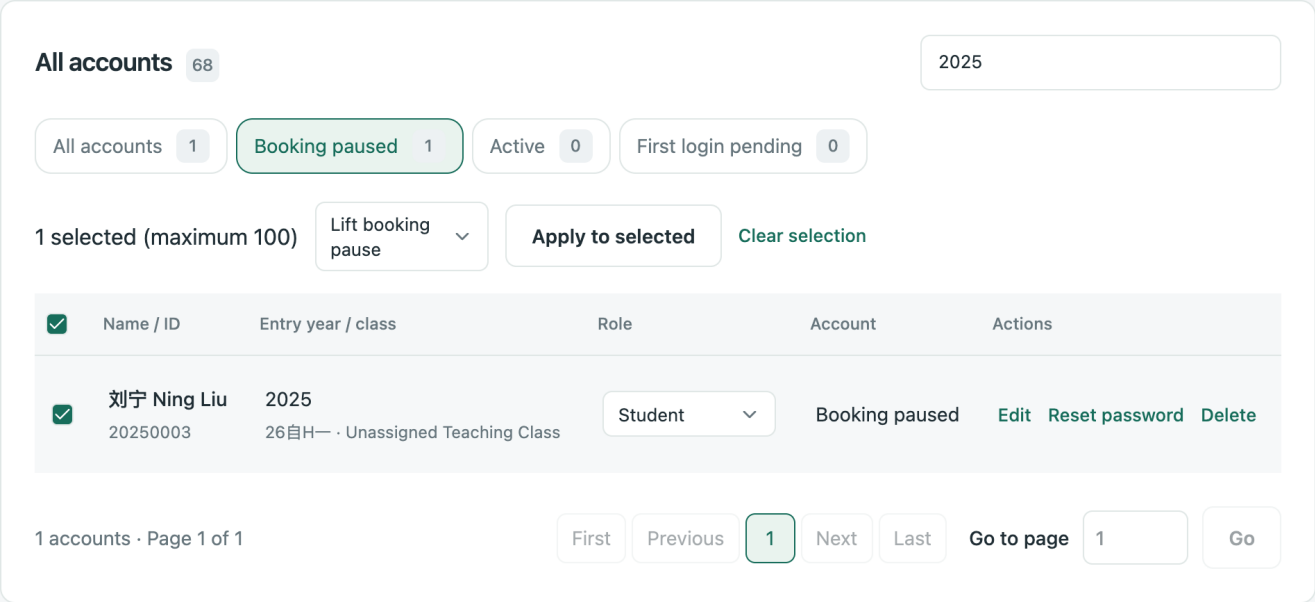

The preview displays the first 50 rows, but a successful import processes every row. Roster imports have no account-count limit; the request must still fit within the 20 MB size limit. The separate limit of 100 selected accounts applies to batch actions, not imports.

Download the generated credentials while they are displayed. Passwords are shown once. Do not distribute the full credentials file to students; provide only the details for each person's account.

ADMINISTRATORS

Use account filters and batch actions

The status controls above the roster show **All accounts**, **Booking paused**, **Active** or **First login pending**. They describe account status, not the status of a particular tutorial. Changing the status filter clears your selection.

Filter to Booking paused, select the required student and choose Lift booking pause.

Lift a booking pause

Select **Booking paused** and tick the students whose restrictions should be lifted. Choose **Lift booking pause** under **Bulk action**, then select **Apply to selected**. Review the confirmation and apply it to the intended accounts.

Only selected students who currently have a booking pause are eligible. Lifting the pause restores their ability to make new bookings, subject to the other booking rules. It preserves passwords, signed-in sessions and meeting history.

Other batch actions

The same selection controls support password resets, student/instructor role changes and deletion. Select up to 100 accounts, choose the action and review the confirmation before applying it. Validation applies to the whole selection: a failure leaves the selection unchanged.

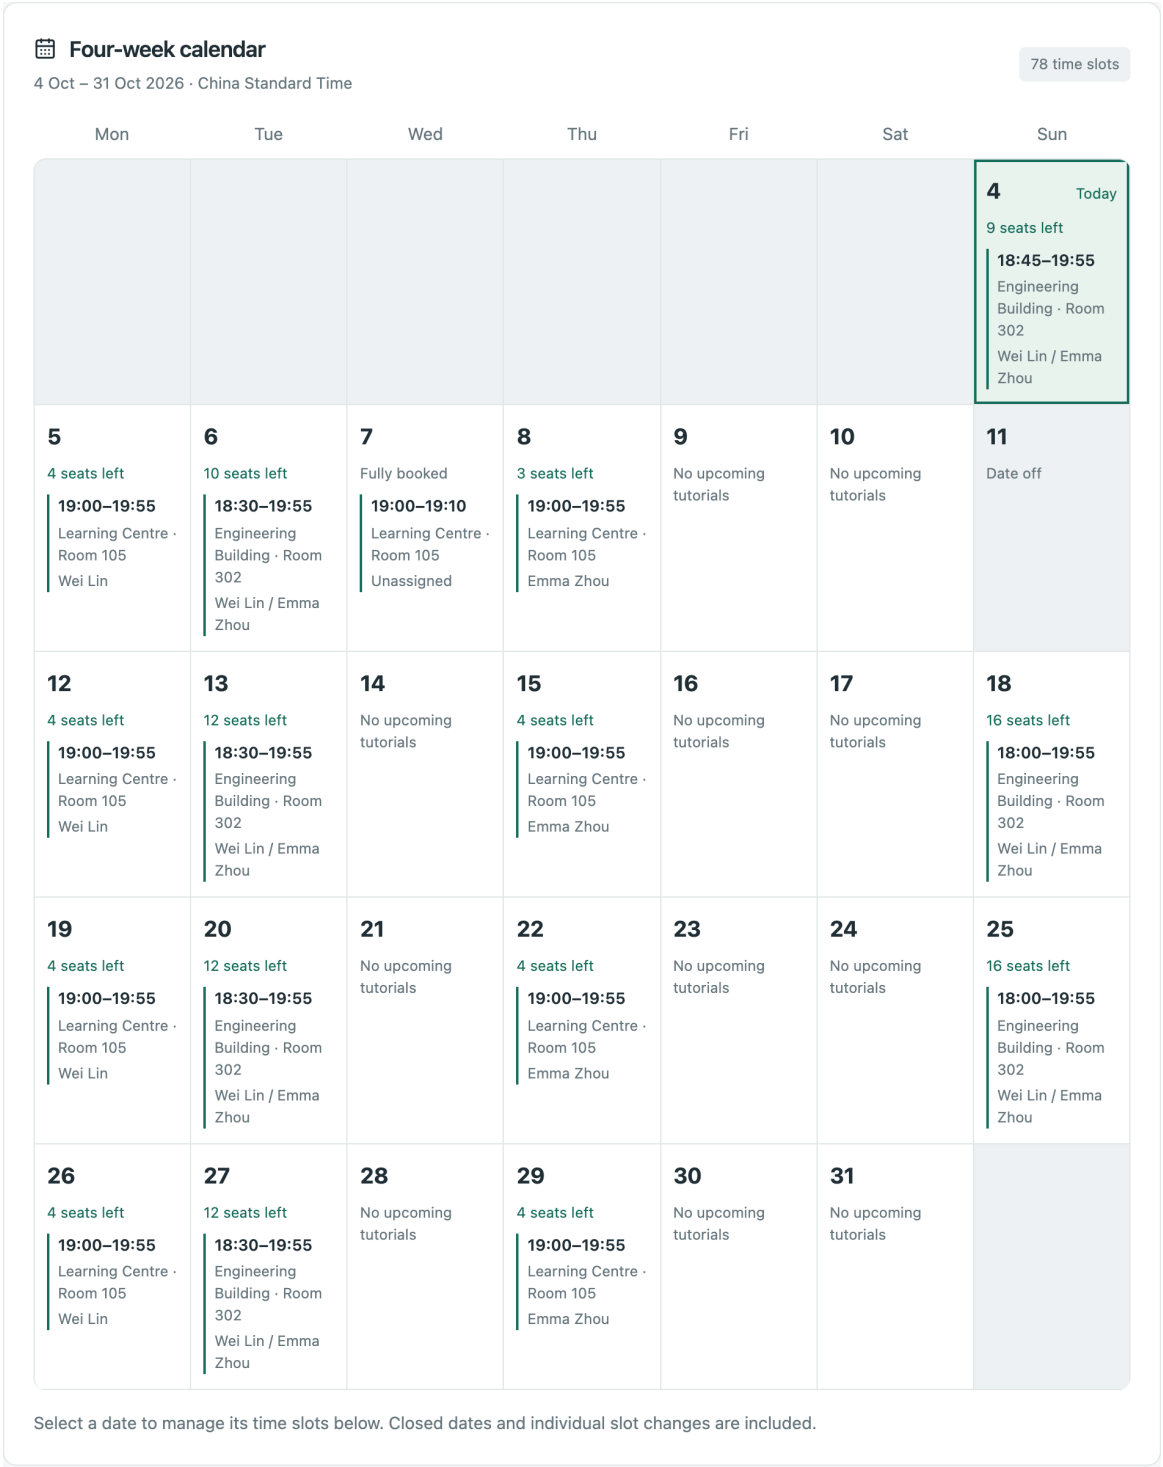

Password resets issue new credentials and end the affected accounts' sessions. Role changes must satisfy the same booking and assignment checks as an individual change. Deletion remains unavailable for accounts with meeting records or teaching assignments.

Check the selection before confirming
Searches and status filters help narrow the list, but the operation applies to the selected accounts. Read the selection count and confirmation, especially when moving between roster pages.

ADMINISTRATORS

Read the availability calendar

Availability opens a 28-day view. Use **Previous 4 weeks**, **Next 4 weeks**, **Show dates from** or **Semester start** to view another period. Select a date to manage its individual time slots below the calendar.

Rooms, instructors and remaining seats are shown for each date. Date off means the day is closed. Administrators can view dates beyond the student booking period. The displayed time range spans the generated slots and can be shorter than the teaching window.

ADMINISTRATORS

Set up recurring teaching windows

A teaching window defines a weekly period, room, instructor pool and capacity. SchedU divides that period into individual appointments. The system administrator must first configure semester dates, classrooms and the meeting/break lengths.

Create a weekly series

In **Availability**, select **Add teaching window**. Choose the weekday, starting teaching week, time range and classroom. Set **Students per slot**, tick the instructors on duty, and leave **Offer slots in this window** selected to publish it.

Check the date preview, then select **Save teaching window**. Assigned instructors enable automatic booking approval. Capacity is the number of students allowed in each slot; it is a separate setting from the number of instructors.

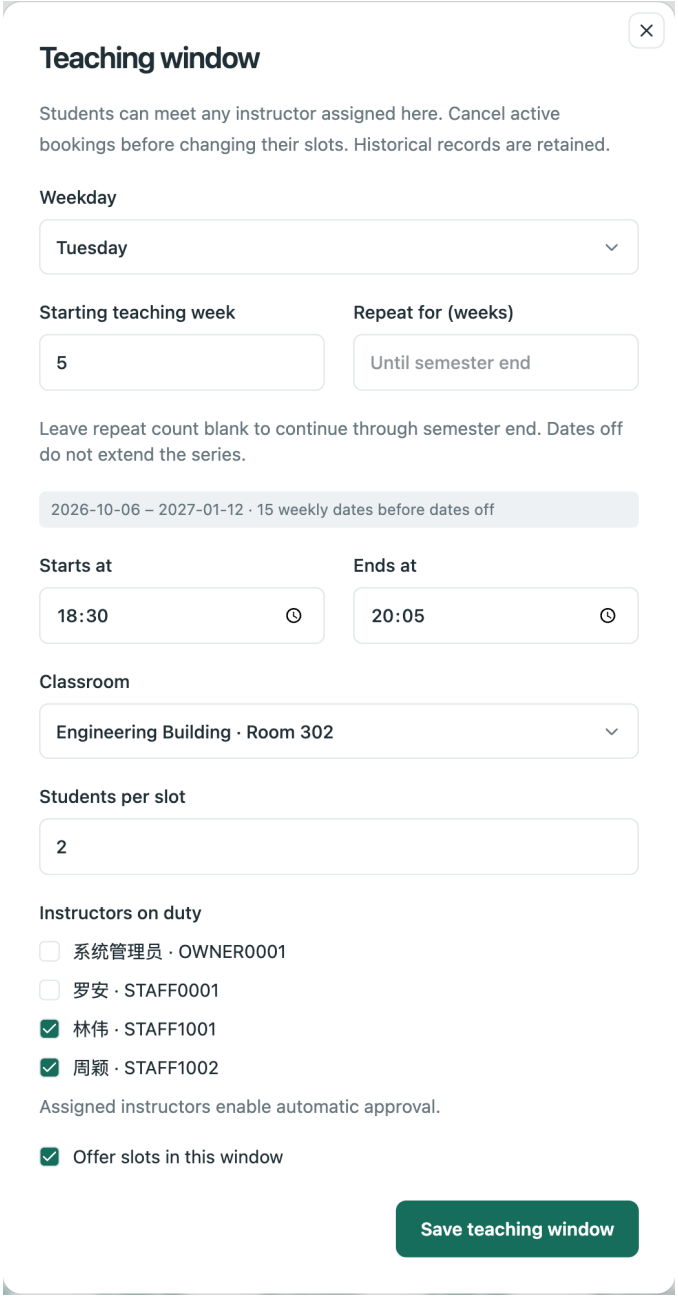

Set the end of the series

Leave **Repeat for (weeks)** blank to continue through the semester's end. Enter a number to stop earlier. A longer count is clipped at the final semester date.

Teaching weeks run Monday to Sunday. Week 1 contains the semester start date. No dates are generated before the semester starts or after it ends. Dates off do not extend the series.

Maintain the series

Expand **Weekly teaching windows** to edit an existing window. Clear its offer checkbox to pause it, or use **Remove** to remove it. Active bookings protect their slots from conflicting changes.

Example: week 5 through semester end gives 15 Tuesdays, from 6 October to 12 January, before any dates off.

ADMINISTRATORS

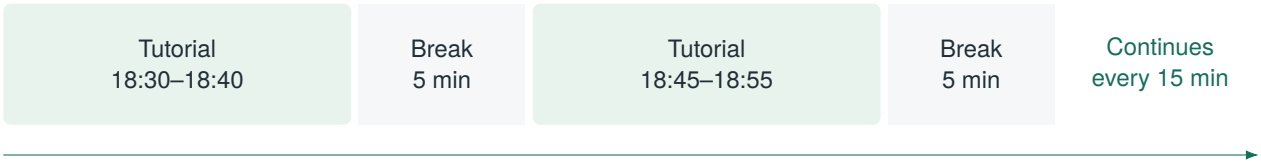

Import a timetable and adjust slots

For several recurring windows, use **Import weekly timetable** under **Weekly teaching windows**. Download the template, fill one row per window, select **Choose CSV**, review the preview and confirm the import. Import adds windows to the existing timetable.

CSV column	Example and rule
`day`	`Wednesday`; weekday names are accepted.
`instructors`	`STAFF1001;STAFF1002`; use existing account IDs, separated by semicolons.
`start`, `end`	`18:30`, `20:05`; use 24-hour times.
`location`	Exact classroom label, such as Engineering Building · Room 302.
`capacity`	`2`; students allowed in each slot.
`startWeek`, `repeatWeeks`	`5`, `12`; optional. Blank means week 1 through semester end.

An unknown instructor, unconfigured classroom or overlapping instructor assignment prevents the import. Correct the source file and review it again. Semester dates must already be set.

How a window becomes appointments

With ten-minute tutorials and five-minute breaks, the final appointment in an 18:30–20:05 window is 19:45–19:55. A 20:00 start is excluded because it would end after the window.

Change one occurrence

In the calendar, select the date and find **Individual time slots**. Use **Edit** to adjust a single occurrence, **Delete** to close or remove it, or **Add time slot** for a one-off appointment. Select the configured classroom and instructor pool, then save.

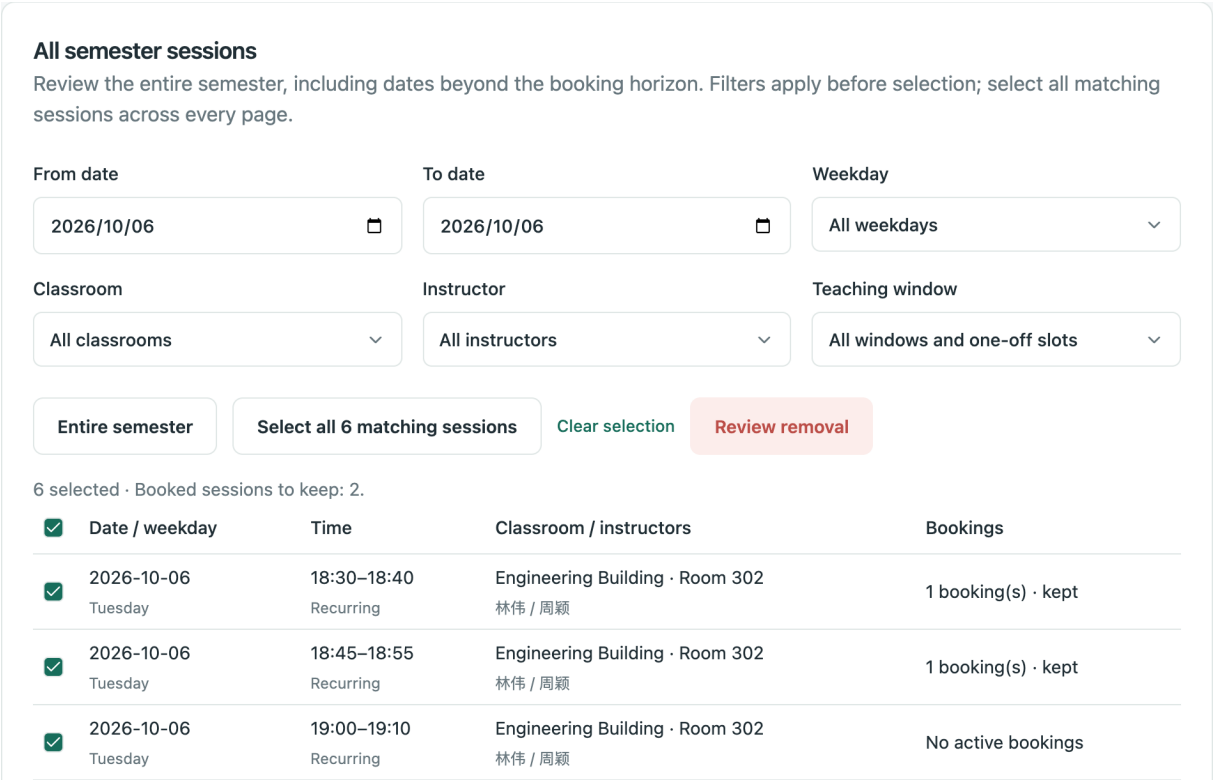

A deleted recurring occurrence stays closed on that date; the weekly series remains. Reopen it through the individual slot controls if needed. A deleted one-off slot is removed. Active bookings must be resolved before their slot is changed.

Dates off closes whole days. Enter one date per line in `YYYY-MM-DD` format and select **Save dates off**. Resolve active bookings on those dates first.

ADMINISTRATORS

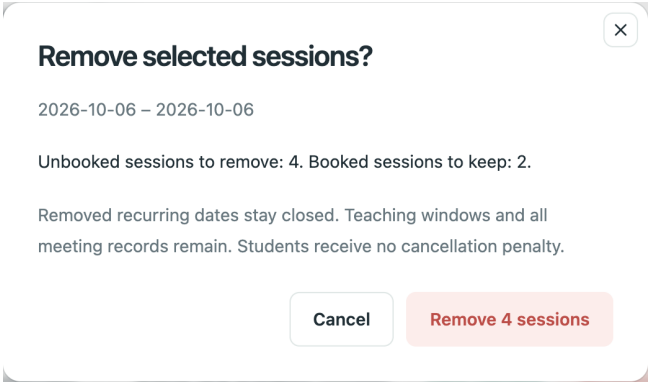

Remove sessions across the semester

Open **Availability → All semester sessions** to find sessions beyond the four-week calendar. Set the date range and, if useful, filter by weekday, classroom, instructor or teaching window before selecting rows.

An excerpt of six selected Tuesday sessions. Select all matching sessions includes every matching page.

Select individual rows, **Select this page**, or **Select all … matching sessions**. Choose **Review removal** and check the counts before confirming.
Sessions with submitted, approved or in-progress bookings are kept. The app removes only sessions without active bookings, and checks again when you confirm.

This example keeps two booked sessions and removes four unbooked sessions.

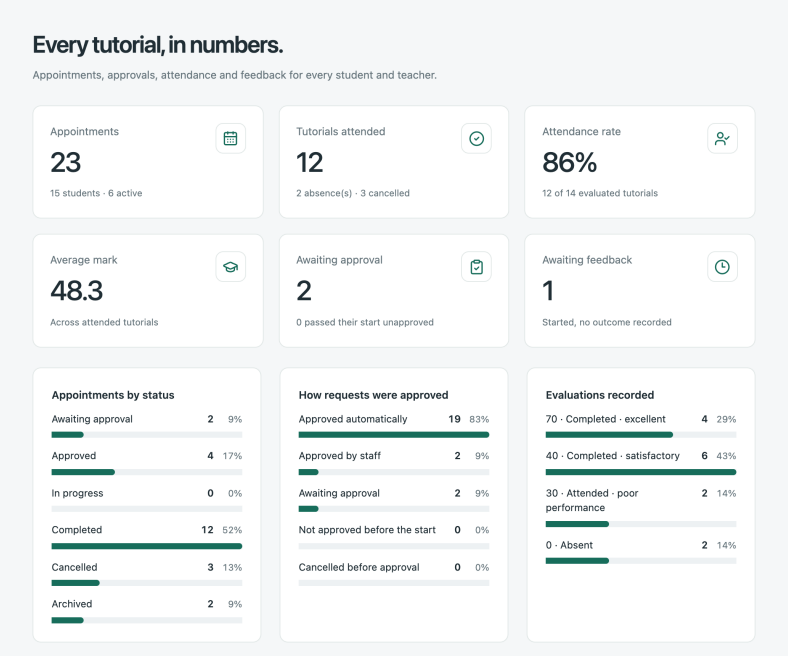

Removed recurring occurrences stay closed; removed one-off slots disappear. Weekly teaching-window definitions and all booking, history and feedback records remain. Students receive no cancellation pause from this operation.

If the schedule changes before confirmation, review the selection again. This operation clears availability; it is not a full-system data reset.

ADMINISTRATORS

Read the statistics

Statistics gives administrators and the system administrator one view of every appointment. It reads the bookings already in SchedU, so earlier records are included, and it refreshes each minute while it is open. Nothing on this page changes a booking.

Institute figures and breakdowns for the demonstration: 23 appointments from 15 students.

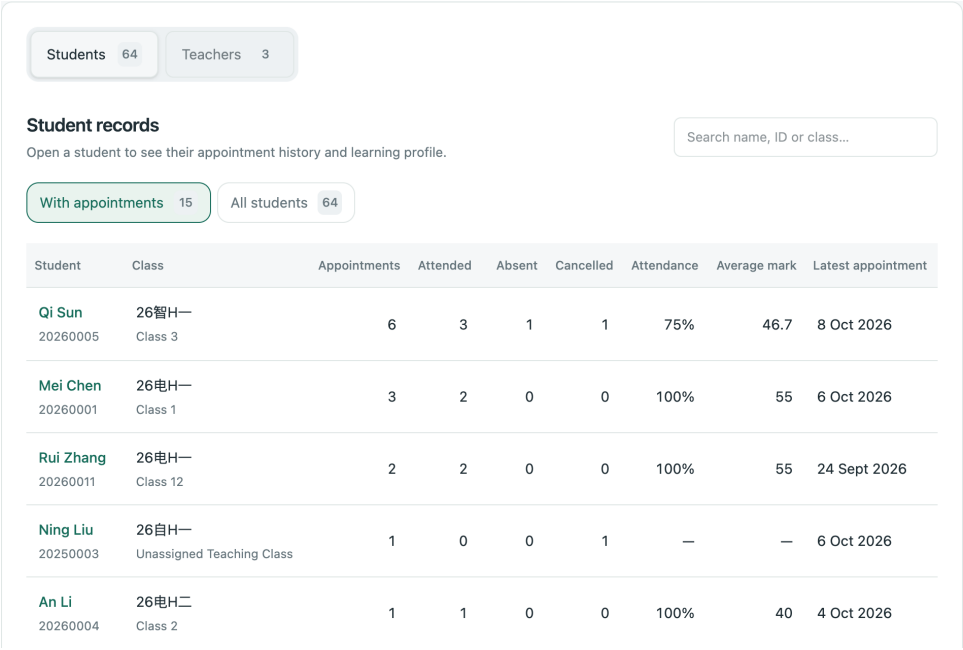

Figure or chart	What it counts
Appointments	Every submitted booking, with the number of students who made them and how many are still active. Drafts are left out.
Tutorials attended	Evaluated tutorials with any mark other than zero, with absences and cancellations beneath.
Attendance rate	Attended tutorials as a share of evaluated tutorials.
Average mark	The mean mark across attended tutorials. Absences are not averaged in.
Awaiting approval	Requests that staff can still approve, and how many passed their start time unapproved.
Awaiting feedback	Approved or in-progress tutorials whose start time has passed without a recorded outcome.
Appointments by status	One bar for each booking status. Archived records are counted as Archived.
How requests were approved	Automatic approvals, approvals by staff, and requests that are waiting, expired or were cancelled first.
Evaluations recorded	How often each evaluation option was given.

Each bar shows its count and its share of the chart's total. Use **Awaiting approval** and **Awaiting feedback** as a daily check, then act on the bookings in **All meetings** (page 14).

ADMINISTRATORS

Open student and teacher records

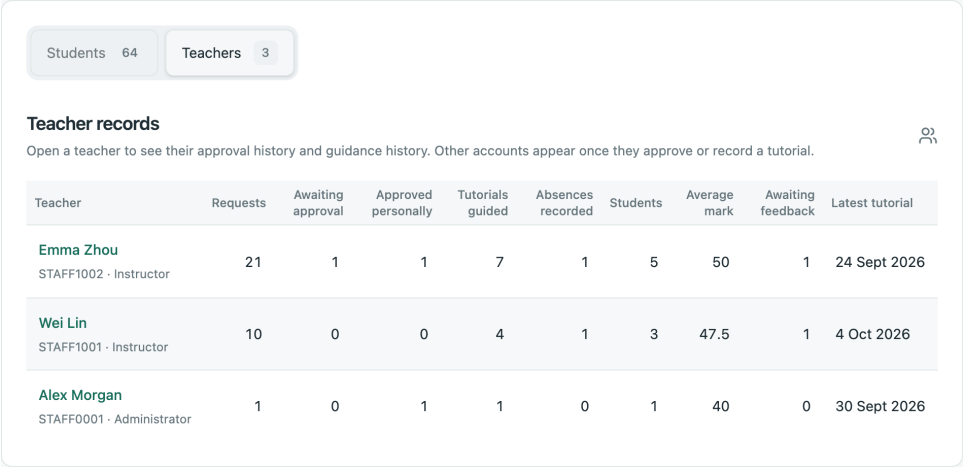

Below the charts, **Students** and **Teachers** list one row for each person. Select a name to open that person's records; **Back to statistics** returns to the list with your tab, search and page kept.

Student	Class	Appointments	Attended	Absent	Cancelled	Attendance	Average mark	Latest appointment
Qi Sun 20260005	26智H一 Class 3	6	3	1	1	75%	46.7	8 Oct 2026
Mei Chen 20260001	26电H一 Class 1	3	2	0	0	100%	55	6 Oct 2026
Rui Zhang 20260011	26电H一 Class 12	2	2	0	0	100%	55	24 Sept 2026
Ning Liu 20250003	26自H一 Unassigned Teaching Class	1	0	0	1	—	—	6 Oct 2026
An Li 20260004	26电H二 Class 2	1	1	0	0	100%	40	4 Oct 2026

Students with appointments, most appointments first. Search by name, ID or class, or switch to All students.

A student's row opens the same **Learning profile** and **Appointment history** that the student sees (pages 8–9). The list shows 50 students per page. A dash means there is nothing to average yet.

Teacher	Requests	Awaiting approval	Approved personally	Tutorials guided	Absences recorded	Students	Average mark	Awaiting feedback	Latest tutorial
Emma Zhou STAFF1002 · Instructor	21	1	1	7	1	5	50	1	24 Sept 2026
Wei Lin STAFF1001 · Instructor	10	0	0	4	1	3	47.5	1	4 Oct 2026
Alex Morgan STAFF0001 · Administrator	1	0	1	1	0	1	40	0	30 Sept 2026

Each instructor's requests, approvals and guided tutorials. An administrator appears after approving or recording a tutorial.

A teacher's row opens the same **Approval history** and **Guidance history** that the instructor sees (pages 12–13), counted by the same rules. Every instructor is listed. Any other account is added once it approves or records a tutorial, and it stays listed if its role later changes or the account is removed.

Selecting a tutorial's date inside a person's records opens the usual details, where your administrator actions remain available.

EVERYONE

Resolve common problems

What you see	What to check or do
Cannot sign in	Check the institutional ID and password supplied to you. Contact an administrator for a password reset if needed.
Review booking is unavailable	Select a slot, complete your profile and check whether you have reached the active-booking limit or have a booking pause.
No suitable time slots	Try another date within the booking period. Slots may be full, closed, past their start time or not yet published. Ask an administrator about availability.
Booking is still Submitted	The slot had no assigned instructor when submitted. Ask an administrator to confirm the staffing and approval.
Booking paused	Check the end date shown in the app. An administrator may lift the restriction where appropriate. Your existing records remain available.
Cancel booking is missing	Students can cancel only submitted or approved bookings before the start. Instructors need the cancellation setting enabled and responsibility for the booking.
Absent cannot be saved	Wait until the tutorial's scheduled end time before recording a mark of zero.
A tutorial is missing from Guidance history	It is listed for whoever recorded its outcome (page 13).
Class or room is missing	Ask an administrator to check the institution's list. An ordinary administrator must refer changes to those lists to the system administrator.
Roster import fails	Check duplicate IDs, required names, entry years and exact class labels. Save as UTF-8 CSV and review the errors. No rows are imported on validation failure.
Schedule change or deletion is blocked	Look for active bookings and instructor assignments. Batch session removal keeps booked sessions automatically. Ordinary account deletion preserves linked meeting records by refusing the deletion.

Ask the right person

Students should contact an instructor about the tutorial or its feedback, and an administrator about account details, access or booking arrangements. Instructors should refer timetable changes and account issues to an administrator.

Ordinary administrators manage meetings, schedules and student/instructor accounts. The system administrator controls global booking rules, semester dates, class and classroom lists, evaluation options, administrator privileges and system maintenance.

When reporting a problem, include the institutional ID, meeting date and time, the action attempted and any displayed error. Do not send a password. A screenshot may help, but avoid sharing other people's personal information.
